Jamie Badman and Colin Miller are Members – serious card man who perform and explain eight effects in this very well produced DVD.

Many of the tricks are variations, a couple requiring huge set-ups. The contents are mostly card magic, although there is one billet mindreading effect. The highlights for me are 'Katch the Kopper', a Triumph variant using an original sleight; 'Smash and Grab', a two card Peek and control; and especially 'The Enforcers', a Collectors variant using the Elias Multiple Shift, explained, a Faro Shuffle and the Erdnase Colour Change for an instant and visual revelation of the selection. Also excellent is 'Misdirection Monte', Jamie's effect using his Underground Change, a Breakless Curry-type move which is explained on DVD for the first time.

There is some very nice magic on this DVD, for intermediate-level card enthusiasts.
